Dear Friends,  
We just had to write to you to tell you some fantastic news:

Faina completed the Golden Lecture, it is available to day at [www.pitt.edu/~super1/](http://www.pitt.edu/~super1/). Faina and Eugene did a fantastic job. It is a WONDERFUL lecture. We are in the process of translating this into 13 languages by friends in the Supercourse. We will include the name of the translators for each lecture. It is downloadable as a PowerPoint file as well as HTML. In the next newsletter we will overview the languages to which the lectures will be translated, and who is helping to translate worldwide. We have a great global team. It is really good, and we all will learn something about prevention by reviewing it.

WOW

You may ask why we are saying "wow". It is because of our good friend Mario Estrada from Cuba. Yesterday morning we began discussions of how to reach a million people. Faina, Mita, Wendy, Akira and I sat around the table thinking that we had reached about a 1000 people, not bad, only 999,000 to go! We were well on our way. Then at 1:00 PM, because of Mario and our friend in Cuba, we will reach almost half our goal. Truly extraordinary. Think about if you could do something like what Mario is doing in Cuba. At 3:00 we decided that perhaps we should revise our goal, instead of a million people, let's try for a BILLION!!! Please write to [ronlaporte@aol.com](mailto:ronlaporte@aol.com), and suggest new distribution ideas.

Ron and friends: In Cuba we think that on Friday September 3, all the Medical Sciences University (18) and another Health Schools (more than 30 for nursery, health technician, etc) will be in Prevention Day, to the same hour, near to a PC, and learning from the Golden Lecture. That means that more than 400,000 medicine and other university students, thousands of nurses, technician, high school students, professors and other health workers in hospitals, institutes and in PHC will be in Global Supercourse. We are working to nominate the Cuban Prevention Day that day. What do we need? To have the Spanish Golden Lecture at least one month before in order to distribute it through all Cuban medical nets, national and province TV stations. What do you think about?

Lets chase a billion people to give them prevention!!

Marcio, Ron, Faina, Mita, Eugene, Abed, Soni, Akira, WoW, Wendy, Tomoko, Julia, Tom, Deb

If you would like to come off this list, please send a message to [super2@pitt.edu](mailto:super2@pitt.edu)
